Quickstep - Bugs and Feature requests

Issue Type	Description (Justification needed for new fatures)	Priority	Comments	Jira Ticket #	Status
Bug	Parallel execution is not working on Windows				
Bug	Unable to run/debug Quickstep from Eclipse on Windows				
Bug	Automation Scripts (Integration-tests) are running in "mvn clean install" phase				
Feature	SlimmerJs feature need to be added Justification: SlimerJS is useful to do functional tests, page automation, network monitoring, screen capture, etc.SlimerJS is similar to PhantomJs, except that it runs Gecko, the browser engine of Mozilla Firefox, instead of Webkit	https://github.com/laurentj/slimerjs/issues/35			
Feature	Chrome driver need to be added as a browser option to run in chrome locally Justification: At the moment we can able to run on firefox locally, if we add Chrome Browser as well, we can run against Chrome driver locally.				
Bug	Parallel execution is not creating html reports locally
